

SUPERPURE

SUPERPURE PREMIUM PS SERIES PLEATED SEDIMENT FILTER CARTRIDGES

REMOVE SEDIMENT, DUST AND RUST FROM DRINKING WATER

SUPERPURE PREMIUM PS Series Pleated Sediment Filter Cartridges are a great way of removing dust, rust and suspended sediment from fluids while maintaining a higher flow rate.

PREMIUM PS cartridges' non-woven filter media is manufactured from 100% pure virgin polyester pleated around a polypropylene core for added strength. The endcaps are moulded from vinyl plastisol. The cartridges are sized for Definitive Water standard size cartridge filters. These cartridges also fit a wide range of industry-standard sized 10 and 20 inch housings.

PREMIUM PS cartridges are designed for purity and will not impart taste, odour or colour to the liquid being filtered. The media is pleated for higher flow and increased dirt-holding capacity to extend the time between cleaning or filter changes.

PREMIUM PS series cartridges are resistant to chemical and bacterial attack and are an excellent choice for all residential, rural, municipal, commercial or industrial applications.

FEATURES

Media manufactured from 100% pure virgin polyester
Pleated for maximum flow and dirt holding capacity
Extra-durable polyester media bacteria and chemical resistant

SPECIFICATIONS

Nominal 1, 5, 10, 20, 50 micron ratings
Lengths: 10", 20"
Diameters: 2.5", 4.5"
Filter Media: Polyester
End Caps: Vinyl Plastisol
Temperature Rating: 1-50°C

SPECIFICATIONS

PRODUCT CODE	SIZE	RATING (NOMINAL)	WEIGHT	MAXIMUM DIFFERENTIAL PRESSURE
PS10M1	2.50" x 9.88" (63mm x 251mm)	1 micron	120g	3 bar
PS10M5		5 micron		
PS10M10		10 micron		
PS10M20		20 micron
